FINANCIAL AND COMMERCIAL.

We have nothing new to report in the stock market. At the first board to-day, the tendency throughout was decidedly downward, and some sales were made; a decline was submitted to. Canton Company fell off 1/2 per cent; Nicaragua Transit, 1/2; New York Central Railroad, 1/4; Erie Railroad, 1/4; Hudson River Railroad, 1/4; Clevelland and Pittsburg, 1. Crystal Palace advanced 3 per cent. The transactions on time, hyper's cartion denote confi and and Pitteburg, 1. Crystal Palace advanced 3 per cent. The transactions on time, buyer's option, denote confidence in the future course of prices, at all events on the part of purchasers. On the other hand, sellers show their belief in a greater depression, by putting out contracts. The operations to-day in railroad bonds covered a greater variety thân quantity, at prices previously current.

The steamship Nashville, from this port for Southampton and Havre, to-day, carried out \$364,071, in specie. The steamships George Law, at this port, from Aspinwall, and Star of the West, from San Juan, brought one million of dollars each of California gold dust.

The Reliance Mutual Insurance Company have declared

The Reissner Autual Insurance company has been a semi-annual dividend of seven per cent.

The market for mining stocks was active, without material change. Dulness is the prevailing rule. One thousand Deep River sold at 30c.—the first transaction that has taken place in this stock at the Mining Board for some time. Lehigh has declined to 3½, but will probably recover when the tone of the market improves.

The receipts at the office of the Assistant Treasurer of the United States, at this port, to-day, were \$163,169 04; the payments amounted to \$204,926 49; leaving a balance ounted to \$204,926 49; leaving a balance hand of \$8,013,620 18.

We published, a few days since, a table showing the rates of dividend paid by certain railroad companies of New England during the year 1853. The table comprised those companies the financial affairs of which centre a Boston, the stock, bonds, &c., being owned principally by Eastern capitalists. It appears that there are severa railroads in the New England States owned and managed by New York capitalists. These roads were not included in the statement referred to, and a correspondent has a suffice a paths following communication on the subject

speciencision which may have arisen relative to the prosuctiveness of railroads in the Eastern States:—

New Englasd Railroads.

To the Roptor of the New York Herald.

A statement appeared in the Herald a few days ago, respecting the value of New England railway investments, which was very incomplete. The inference to be drawn from it is that these roads are generally unprofitable, and therefore bad as investments. That statement omitted to mention some very important Eastern reads, to wit:—the New Haven and Hartford, which pays five percent semi-annual dividends, and the stock of which sells at 126. The New York and New Haven was likewise omitted: this stock is temporarily depressed, in consequence of the company passing its two last dividends, and is yet sold at 102. The Naugatuck and Stonington roads were also omitted; the former paying eight and the latter seven per cent annually. The stock of the Stonington is sew 16, which makes it a ten per cent investment, if bought at that figure. The Norwich and Worcester road was quoted as paying two per cent semi-annually. The last dividend this company paid was three per cent, and as its business is steadly increasing, the probability is that the unit of the stoning to the state of the st

The market for salt opened at nine shillings per barrel, and with the exception of a temporary advance in November, has semained uniform. The business has yielded a fair equivalent for the capital invested. The activity of the market has led to the erection of thirty-nine blocks during the last year; of these, twenty-one are in the First ward, three in the Second ward, twelve at Liverpool, and three at Geddes; making the whole number on the reservation two hundred and thirty-nine. The solar salt works have also been extended.

The commencement of the working of the salt spring in Quendags, was on the 39th of June, 1797. The produce of that year's work was 25,474 bushels. In 1805 the yearly produce was raised to more than 100,000 bushels, continuing to increase until 1827, when it amounted to nearly 1,000,000. From that year the annual product was as
